

2008 K-12 Classroom Technology Project

Grant and Registration Program Application Form

The Audio Video Resources Grant and Registration program promotes increased visibility to K-12 education technology projects. This program brings together Audio Video Resources, Strategic Technology Partners, and Educators. The common goal is an understanding that the interaction of education technology will boost students' interest and achievement in the classroom, as well as help prepare them for lessons at a higher level of education, and the professional workplace.

The pilot classroom will be used by the district technology leaders, administrators and instructors to evaluate and define audio visual systems standards. Audio Video Resources will work with the District and proven technology providers to assist in technology assessment and integration into additional common areas, and classrooms.

By applying to register the project, the applicant agrees that the information contained on the registration application is timely and accurate. Additionally, it should be understood that an Audio Video Resources, CTS certified, Education Account Manager, will be in contact with the end users and District personnel. The purpose of this contact is to evaluate and address questions regarding the Audio Video Resources products and systems under evaluation. Information relevant to the successful transaction and support of AVR products will be communicated between the District, Audio Video Resources, and the Strategic Technology partners.

Contact Name _____

Address _____ City _____ State ____ Zip _____

Work Number (_____) _____ E-mail _____

District _____ School(s) _____

Address _____

4323 East Cotton Center Blvd
Phoenix, Arizona 85040

Confidential Proprietary Information

Please answer the following questions. These are the criteria which will be used to evaluate the award of the grant, so we urge you to be concise, and complete. Feel free to attach additional pages if there is not enough room for you to fully answer a question in the space provided.

Please fill in the total amounts where indicated.

- 1. Number of Students Enrolled in the District _____
- 2. Number of Classrooms in the District _____
- 3. Number of Schools in District _____
- 4. Number of Technology Enabled Classrooms to be installed District wide within 18 months. _____ Locations _____
- 5. Is the District presently working with an integration Reseller or consultant? ___No ___Yes (please specify company & contact) _____
- 6. Does the District presently have installed data projectors, or are you working with a specific brand of data projectors? ___No ___Yes (please specify brand) _____
- 7. Please describe the District Technology office and its structure in respect to providing standards to the individual schools within the District. _____
- 8. What is the Audio Visual Budget for the project \$ _____ Hardware per Room \$ _____ Installation per room \$ _____
- 9. What is the instructional strategy for annotating? _____
- 10. What is the instructional strategy for capturing content from classroom lessons? _____
- 11. What is the instructional strategy for teacher and student voice amplification? _____
- 12. What is the instructional strategy for student response? _____
- 13. When will you provide your technology plan? _____

Please indicate the quantity and type of sources being planned in the technology enabled classroom:

PC ___ Laptop ___ DVD/ VCR combo ___ I-Pod ___ MP3 ___ CATV ___ Document Camera
Type _____ Audio
Speakers: Ceiling _____ Wall mount _____

Will Voice reinforcement or microphones for the instructor be used in these rooms? ___No ___Yes Wired
_____ Wireless _____

Do these apply for all future classrooms? No ___Yes ___ How many? _____

Audio Video Resources Terms of Grant

The system and products encompassed by the Grant program are limited to those engineered systems and products supported by Audio Video Resources. The eligible products in the grant will be specified in a formal proposal, with detailed scope of work, from AVR, to the District.

The Grant requestor is responsible for installation costs. Installation of the Pilot or Demo classroom will be performed by certified Audio Video Resources technicians.

Eligibility: Any public or private, not-for-profit, primary or secondary education provider or School District.

Applications are always accepted. Applications are reviewed on a monthly basis by the AVR Grant Committee.

Groups being considered for grants will be given latitude in designing rooms as outlined in discussions with the AVR Account Manager and Engineering staff. Final selection of a system will be based on the information included in the application, the technology plan, and discussions with the applicant. AVR reserves the right to make final grant award based upon its experience, and the relevancy of the system to support the technology objectives.

Audio Video Resources reserves the right to cease offering the grant program at any time.
